CURRENT JOB

I currently work as **Product Owner** for one software component at a leading automotive manufacturer. My job is to collect **requirements**, prioritize them according to my stakeholders' and business needs and my personal take on the product and its development challenges, keep **communication** flowing and make my team engaged and productive.
I'm the main responsible person of the **product backlog** and the source of plans for the development teams and the suppliers.

PROFILE

I am a **Certified Scrum Product Owner (CSPO)**, a **ScrumMaster (CSM: #128662)** and enthusiastic **Agilist**, with experience in waterfall and Agile working methodologies gained working for over 18 years in many roles, companies and businesses over the entire **Software Development Life Cycle** (from requirements collection to deployment).
I offer Product management experience and skills married with a deep technical understanding, coming from years as a developer and kept up-to-date constantly on the job.
I believe that quality can be achieved with the right process, in which deliver often and regularly and get feedback to continuously adjust course take a prominent place.
I support Test Driven Development, pair reviews, code reviews, quality software design, development and test, testing automation.

CERTIFICATIONS AND EDUCATION

| | | | |
|-----------|-----------------------------|---------------|---|
